Abnormal Wear – Central Wear

CAUSES:

• Over inflation.
• Improper matching of tyres and rims.
• Tyres are not rotated timely.

RECOMMENDATIONS:

• Use tyres under the recommended air pressure and load.
• Use proper rims.
• Rotate tyres timely.

HOW TO CHECK:

Inspect the tread visually and measure the remaining depth of each main groove with a depth gauge.

AREA: TREAD

CONDITION: The centre of tread wearing faster than the shoulders.
